Vote Center Plan

INDIANA ELECTION COMMISSION
2017 OCT 10 AM 9:45

Lawrence County,
Indiana

LAWRENCE COUNTY VOTE CENTER PLAN

INTRODUCTION

Lawrence County began the study of vote centers after input from the voters, elected officials and party leaders. Currently, over 30 counties in the State of Indiana use vote centers with high success and popularity with many others exploring the possibility.

In April of 2017, the County Commissioners and County Council passed Resolutions 2017-05 & 2017-06 Approving the Designation of Lawrence County as a Vote Center County. A Vote Center Committee was then established which consists of the following members: Billie Tumey- Lawrence County Clerk, John Williams Jr.-Republican Election Board Member, Don Robertson-Democrat Election Board Member, Don Henderson -Former Democrat Election Board Member, Gene McCracken-Lawrence County Commissioner, Julie Hewetson-Lawrence County Council Member, Scott Nikirk-Lawrence County Information Technology, Chris May-Republican Chairman, Matthew Ray-Democrat Chairman, Janie Craig Chenault-Republican Appointment for the Public and Chris Woods-Democrat Appointment for the Public.

The vote center committee held meetings to discuss in detail the criteria of what is expected for vote center counties. Discussions included the pros and cons of both precinct and vote center voting processes, electronic poll books and vote center locations. The top priority was to find handicap accessible locations on heavily trafficked roadways throughout the county. With the county being a rural county, some townships were very limited. After much discussion, it was decided it would be feasible to have 10 vote center sites. There is at least one site within a 5-mile radius of a township boundary. The vote center plan was present in a Lawrence County Election Board public hearing on August 21st 2017. The 30-day public comment period ended on September 19th. There was no public comment made at Voter Registration Office. The vote center plan was also published in The Times Mail newspaper.

Plan effective date October 2, 2017.

WHAT IS A VOTE CENTER?

A vote center is a polling place where any eligible voter in the county may go to vote. The voter center model gives voters more flexibility on Election Day because they are not constrained to a specific polling location. Vote centers are connected through secure internet connections. Electronic poll books are instantaneously updated when the voter signs and then casts their vote. Vote machines are not connected to the internet.

Vote centers are currently successful in over 30 Indiana counties with the passing of Senate Enrolled Act 32 and House Enrolled Act 1242 in 2011.

The Lawrence County Vote Center Plan will allow voters to have a choice to vote at any of our 10 locations. All machines at each vote center will be programmed with all 40 precinct ballots in the county. In the case of a municipal election, they will be programmed for all city and town precinct ballots. All 40 precincts will remain in effect, a vote center simply allows voters to vote at any vote center location.

Voters will be able to vote anywhere in the county; on their way to work, to the grocery store or doctor's appointment. The voter can still vote by mail, vote absentee at the courthouse on weekdays, travel board if confined or at the courthouse on the two Saturdays before Election Day. All vote centers are located at ADA compliant locations (as required by statute).

Absentee voting will not change. Voters may vote by mail, absentee traveling board, at the Voter Registration Office 30 days prior to elections and at the Courthouse the two Saturdays prior to election.

ECONOMIC FEASIBILITY

The Election Board believes the vote center plan will save the county money in the long run, but the main purpose of the vote centers is to increase voter convenience and accessibility. With less poll sites, we will greatly alleviate a serious problem of not having enough poll workers. Fewer workers will be a cost savings to the county. The staffing cost for 40 precincts with 5 election workers at each location and the cost of the meals is approximately \$20,900 per election. Some precincts have been combined for a total of 26 voting sites with a cost of \$14,312 per election. The estimated cost of 10 Vote Centers with 5 to 7 workers is \$6,140 per election.

REQUIREMENT OF PLAN

In compliance with IC 3-11-18.1-4(5), Lawrence County will have 10 vote center locations placed strategically throughout Lawrence County. Most of these locations were used in previous elections. The sites were selected because of their accessible location, parking, handicap accessibility and space for equipment. They accommodate The City of Bedford, The City of Mitchell, The Town of Oolitic and the rural residents of Lawrence County. The Board verifies that all sites are ADA compliant.

A vote center map is attached to this plan and references the vote center locations in Lawrence County.

VOTE CENTER AND SATELLITE VOTE LOCATIONS

Lawrence County plans to utilize 10 vote center locations. Indiana Code 3-11-18.1-6 only require one vote center per 10,000 active voters, but the Lawrence County Election Board plans to provide one vote center per roughly 3,300 voters based on November 2016 totals or roughly 3,000 voters based on August 2017 totals.

As of November 2016, General Election:

(a) Total number registered voters within Lawrence County	33,367
(b) Total number of active voters within Lawrence County	28,018
(c) Total number of inactive voters in Lawrence County	5,349

As of August 10, 2017

(a) Total number of registered voters within Lawrence County	29,949
(b) Total number of active voters within Lawrence County	27,745
(c) Total number of inactive voters within Lawrence County	2,204
(d) Total new pending registrations as of 8/10/17	124

The following are Lawrence County Vote Center locations to be open on Election Day 6 A.M. – 6 P.M.:

(Locations may be reviewed and amended prior to each election cycle.

Mid-Term and Presidential Elections

1. Lawrence County Courthouse-916 15th Street, Bedford IN 47421
2. Parkview Intermediate School-2024 W 16th Street, Bedford IN 47421
3. Stalker Elementary School-420 W St. Bedford IN 47421
4. Needmore Elementary School-278 Trogon Lane, Bedford IN 47421
5. Fayetteville Elementary School-223 Old Farm Rd Bedford IN 47421
6. Bedford North Lawrence High School (cafeteria) 595 N Stars Blvd. Bedford IN 47421
7. Lawrence County 4-H Fairgrounds-11265 US Hwy 50 W Bedford IN 47421
8. Mitchell Community Center -101 Tom Green Drive, Mitchell IN 47446
9. Emerson School Gym-441 N 8th Street, Mitchell IN 47446
10. Dollens Elementary School-903 Hoosier Ave, Oolitic IN 47451

Municipal Elections

City of Bedford

1. Lawrence County Courthouse-916 15th Street, Bedford IN 47421
2. Parkview Intermediate School-2024 W 16th Street, Bedford IN 47421
3. Stalker Elementary School-420 W Street, Bedford IN 47421

City of Mitchell

1. Emerson School Gym-441 N 8th Street, Mitchell IN 47446

Town of Oolitic

1. Dollens Elementary School-903 Hoosier Ave, Oolitic IN 47451

The following is the Lawrence County Satellite Voter Center location to be open for Early Voting the two Saturdays prior to election from 9 A.M. -3:30 P.M.:

1. Lawrence County Courthouse, 916 15th Street, Bedford IN 47421

There will be one (1) satellite vote center at Lawrence County Courthouse on the two (2) Saturdays prior to each election. At the beginning of each day, poll workers will collectively match the number of voter signatures on the electronic poll book to the number of voters on the voting machines. At the close of the day, the Republican and Democrat Election Workers will return voting equipment to the Voter Registration Office. At the close of absentee voting on the Saturday prior to the election, the voting machines will be securely locked and stored until the vote counting process on Election Day. This procedure is for all elections.

The Lawrence County I.T. Department will be available on Election Day, and Lawrence County I.T. will assist vote centers if there are any disruptions with internet or technology on Election Day.

VOTING MACHINES

Lawrence County utilizes the MicroVote Infinity voting system. Each voting panel will be programmed to include all of the county's precinct's ballot information to assure that every voter's ballot will be available at each vote center. An appropriate number of voting panels and their booths will be configured with shorter legs and leg extenders to accommodate wheel chair access. Each vote center location will be equipped with the double-talk unit which can be plugged into any voting panel to make it accessible to the visually impaired, while still maintaining voter privacy.

After the voting panels and booths have been set up at the vote center, a review of each ballot style will take place using the "show ballot" feature. After this examination, a zero proof will be printed for each voting panel to make certain all equipment is operating correctly.

On Election Day, another "official" zero proof will be printed prior to starting the voting panel for voting. Voting on the panels will continue throughout the day until all qualified voters that have arrived in time have been processed.

Each voting machine will be tallied at the end of day and a results tape will be printed. The total number of votes on each panel at each vote center site will be tabulated and compared to the number of check-ins on the electronic poll books.

The tally cards from each voting panel will be returned to the county courthouse to be electronically read for consolidated tally results from all vote centers on a central computer that had, earlier on Election Day, processed the mail ballot and in-person absentee ballots. The central tabulation software offers both consolidated countywide vote results and also precinct level separation regardless of which vote center votes were cast.

Infinity Specifications:

Model: MicroVote Infinity VP1

State and Federally Certified to 2005 VVSG Federal Testing

Size:	16 1/2 in. wide X 13 in. high X 2 1/2 in. deep
Weight:	4 3/4 lbs. panel only. Approximately 23 lbs. with cords and booth
Operating Temp.:	40 to 100 degrees
Storage Temp.:	-15 to 140 degrees
Humidity:	90% RH max, non-condensing
Power Input:	Standard 1/4" miniature power jack, 12VDC @ 2.5A max
Indicators:	(2) Red LED Cast Vote indicators
Keyboards:	Custom conductive rubber over gold contact
Data Integrity:	Non-Volatile Storing of multiple data sets with cross-checking

VOTING EQUIPMENT

ELECTRONIC POLL BOOK

Lawrence County will be utilizing the Knowink Electronic Poll Pad (e-poll book). The system is certified with the Secretary of State's Office. The Knowink Poll Pad application software runs on the Apple iPad tablet. The e-poll book is managed by central command and interfaced with the Quest Voter Registration System. In the event of a power failure, the e-poll books will continue to operate for 4-6 hours before needing recharged. Each Lawrence County Vote Center will have at least one (1) Knowink Electronic Poll Pad. These e-poll books will update every two (2) minutes to eliminate anyone voting in more than one location.

For the vote centers located at schools, the vote board will be using the schools secure internet access. For the vote centers located at Mitchell Community Center and Lawrence County 4-H Fairgrounds, the vote boards will be using a Verizon Wireless Hot Spot with a booster

The KNOWiNK Poll Pad is based on an Apple iPad and runs on iOS software. The Poll Pad stores the complete, current voter database for an election authority (e.g. county), and updates voter status before, during and after any specific election. All Poll Pads at a specific polling location communicate with each other through Peer to Peer (P2P) technology, which uses a combination of Bluetooth and Wifi technology to update voter statuses instantly on Election Day. With internet connectivity, the Poll Pad will communicate with all other Poll Pads operating within the election authority (through a centralized server) on Election Day, updating voter statuses throughout the entire jurisdiction within minutes. This feature allows the Poll Pad to be used in jurisdictions using voting centers, and has been used in states such as Indiana for years in this capacity.

E-POLL BOOK DISTRIBUTION

The Courthouse will have 10 machines with 2 to 3 e-poll books

Parkview Intermediate School will have 8 machines with 2 e-poll books

Stalker School will have 6 machines and 1 e-poll book

Emerson Gym will have 8 machines and 2 e-poll books

Mitchell Community Center will have 6 machines and 1 e-poll book

4-H Fairgrounds will have 8 machines and 2 e-poll books

Fayetteville School will have 6 machines and 1 e-poll book

Oolitic Vote Center (Dollens School) will have 6 machines and 1 e-poll book

Needmore School will have 8 to 10 machines and 2 e-poll books

BNL Cafeteria will have 10 machines and 2 to 3 e-poll books

There will be 1 or 2 e-poll books and 2 to 4 vote machines on hand for a failsafe.

Additional machines may be added to any center at the discretion of the Lawrence County Clerk.

EMERGENCY RESPONSE

In the event of a power failure at any vote center, the voting machine and e-poll books will be switched to battery backup. For obvious reasons, if the safety of voters or poll workers is ever at risk, the Lawrence County Emergency Management Plan will go into effect with instructions from the Lawrence County Clerk, Lawrence County Election Board, Lawrence County Sheriff and Lawrence County Emergency Management.

PUBLIC REVIEW

The Lawrence County Voter Center Plan 30-day public review dates were August 21st through September 18th in The Lawrence County Voter Registration Office in the Lawrence County Courthouse, Room 11, Bedford. No public comments were made during the public review.

POLL WORKERS

Each vote center will have at least:

One-Inspector, Two- Election Judges (one from each party) and Two-Election Clerks (one from each party). Vote centers with 8 or more machines may have two additional workers (one from each party).

The Satellite location will consist of at least four election workers, (two from each party).

Nomination of election workers will apply according to IC 3-6-6-9. However, if the appropriate parties do not nominate poll workers in the time allotted per statutes, then the Election Board will nominate workers.

POLL WORKER TRAINING

All Inspectors are required to undergo training provided by the Clerk prior to Election Day. Judges & Clerks are welcome to attend the training but are not required and are not paid to attend. Training will include the duties of the poll worker and the supplies provided in the vote center tote. It will also include training on the voting equipment and poll pads.

VOTE CENTER PROCEDURES

Each voter will enter the center and provide his/her government issued ID to the Poll Clerks at the entrance of the center. The Poll Clerks will access the individual's voter profile via an e-poll book equipped with a scanner to read the voter ID card. The Poll Clerk will also have the ability to type in the voter's name to access the correct profile. Once the voter's address has been verified through the e-poll book, as required by state statute, a label will then be printed and given to the Judge. The Judge will receive the printed label and proceed to the Infinity voting machine with the voter. The printed label will indicate which ballot the voter is to receive for their registered address. The Judge will then activate the Microvote Infinity voting machine and select the appropriate ballot in order to verify it with the voter. The voter will then proceed with voting on the Infinity machine in the same manner as always. The Judge will keep the printed label in an envelope which will serve as hard copy documentation (the poll list) that the voter has voted in addition to the electronic information. Both political parties will oversee the voting process. This includes voter check-in, placing voters on machines, printing off tally tapes, assisting poll watchers, and returning all of the supplies at the end of Election Day.

VOTER EDUCATION

It is important that the citizens of Lawrence County understand the vote center process. Communication through the media will be utilized as well as fliers and signs detailing vote center locations, dates and times for early absentee voting.

The Lawrence County Election Board realizes that there are positive and negative ramifications in both the precinct and the vote center voting process. Political parties in the past have struggled to secure enough poll workers to maintain the election process. Vote centers would reduce the number of poll workers needed in the mid-term and presidential election from 200 to approximately 60.

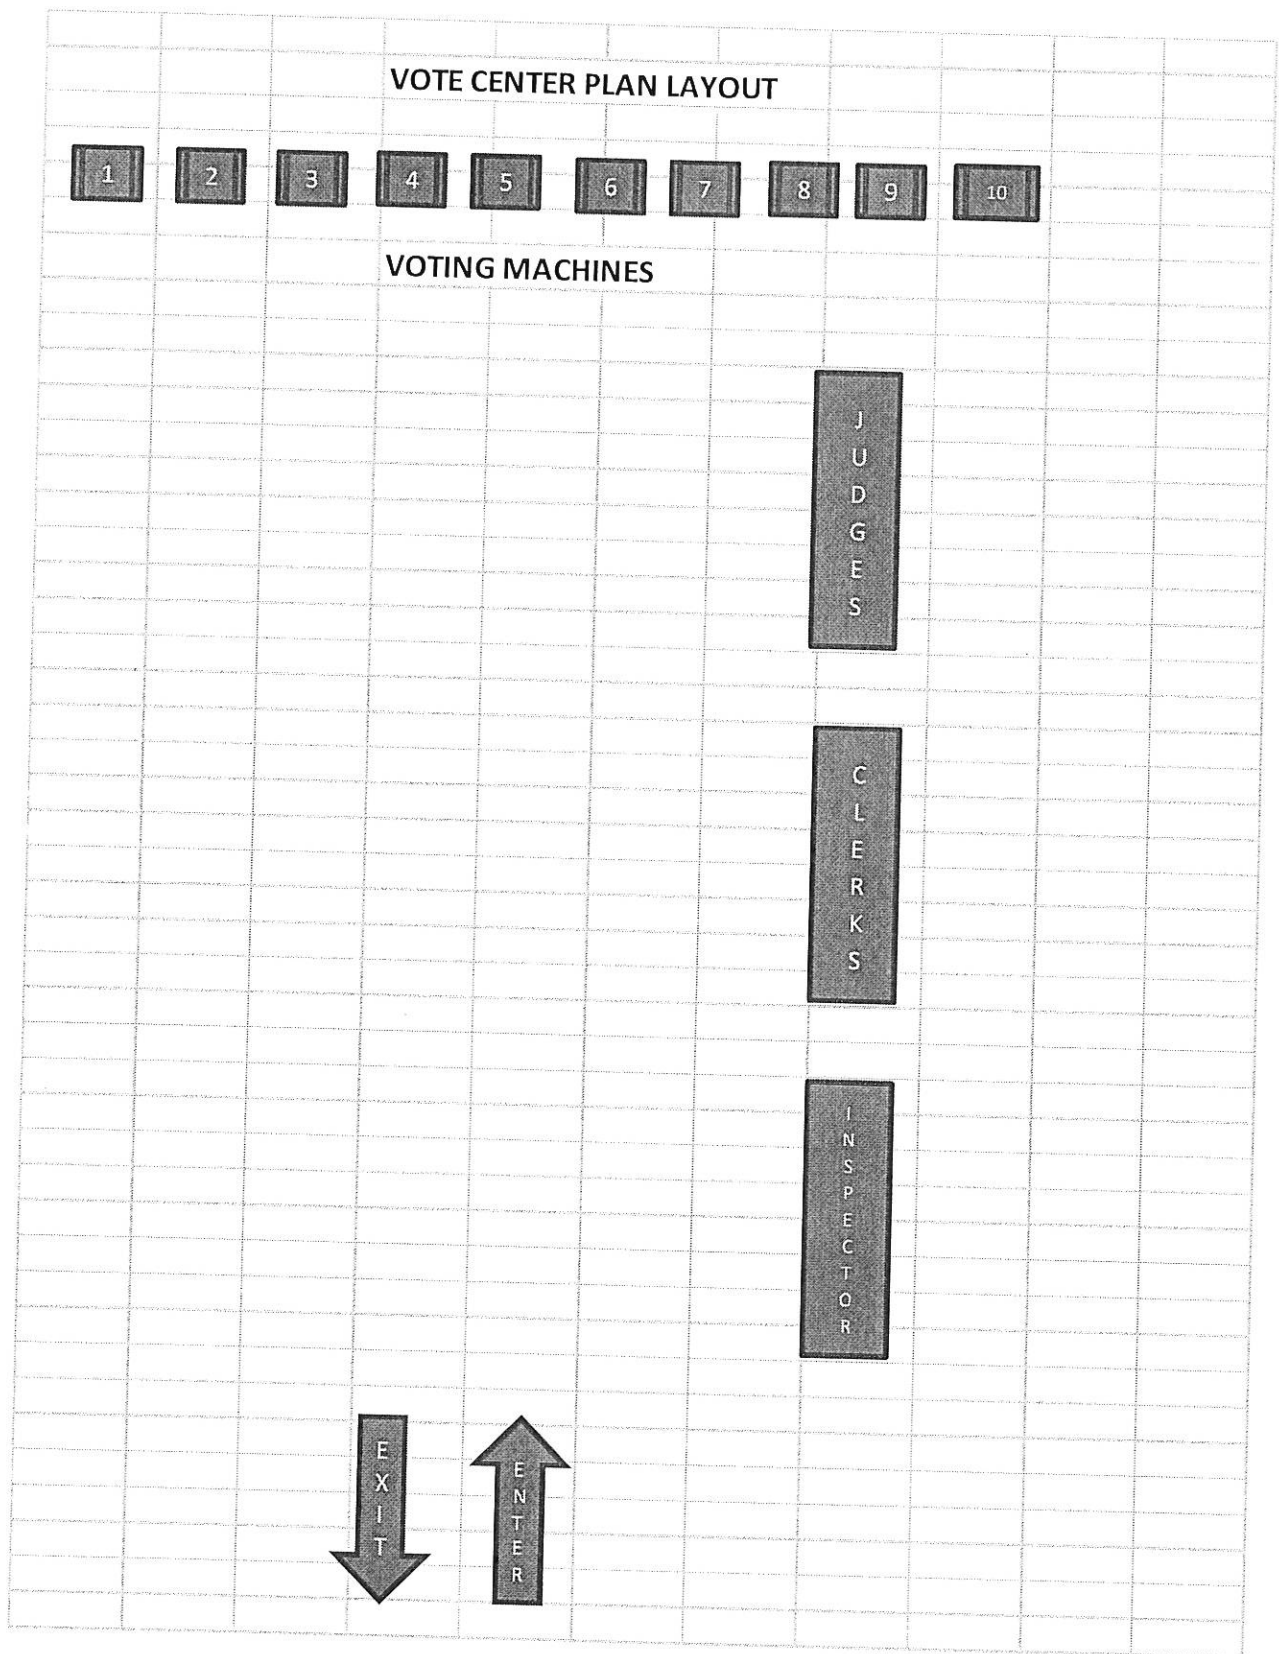

ELECTION RESULTS

Lawrence County is a central count county and the election results will be tabulated in the Lawrence County Clerk's Voter Registration Office on Election Day. Absentee voting by mail and travel board will be processed by optical scan ballot. Satellite voting machines and courthouse early voting machines will then be tallied. As vote centers close on Election Day and the machines arrive back at the courthouse, tally cards will be scanned for each machine and votes calculated. Election results will be tabulated by precinct totals and released to the party officials and public in a timely manner.

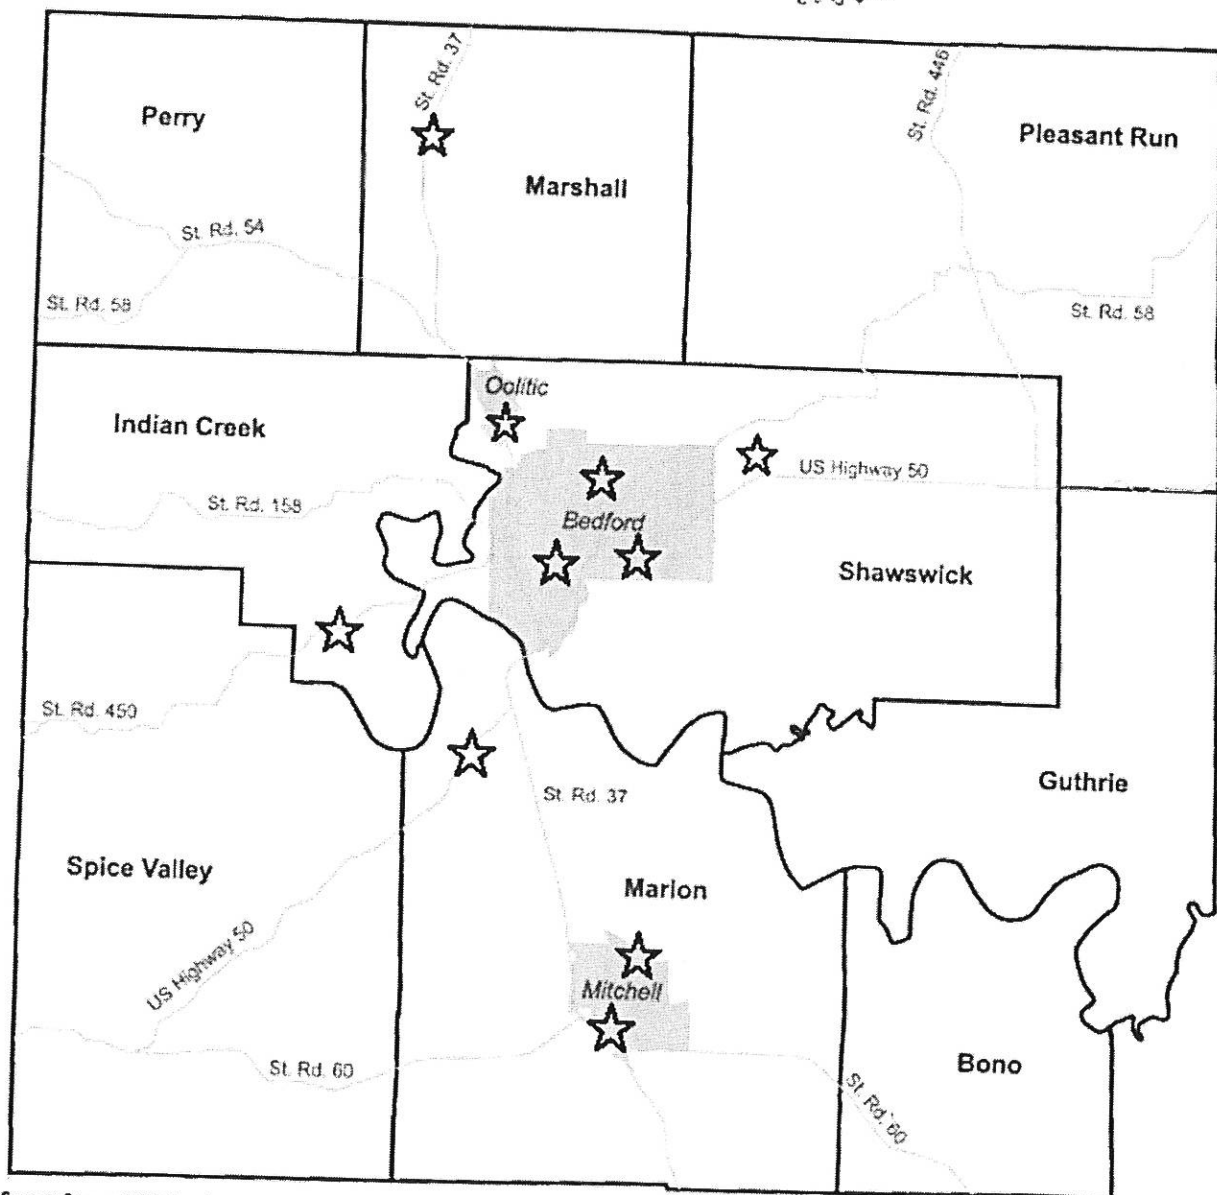

I.C. 3-11-18.14-4 COMPLIANCE CHECKLIST

1. The total number of vote centers to be established.
2. The location of each vote center.
3. The effective date of the order.
4. The following information according to the computerized list (as defined in IC3-7-26.3.2) as of the date of the order. (A) The total number of voters within the county. (B) The number of active voters in the county. (C) The number of inactive voters within the county.
5. For each vote center designated under subdivision (2) a list of precincts whose polls will be located at the vote center consistent with subdivision 13.
6. For each vote center designated under subdivision (2), the number of election boards that will be appointed to administer an election at the vote center.
7. For each precinct election board designated under subdivision (6) the number and the name of each precinct the precinct election board will administer consistent with section 13 of this chapter.
8. For each vote center designated under subdivision (2) the number and title of the precinct election officers who will be appointed to serve at the vote center.
9. For each center designated under subdivision (2); (A) the number and type of ballot variations that will be provided at the vote center; and (B) whether these ballots will be; (I) delivered to the vote center before the opening of the polls or (I) printed on demand for a voter use.
10. A detailed description of any hardware, firmware or software used; (A) to create an electronic poll list for each precinct whose polls are to be located at a vote center; or (B) to establish a secure electronic connection between the county's election board and the precinct election officials administering a vote center.

11. A description of the equipment and procedures to be used to ensure that information concerning a voter entered into any electronic poll list used by precinct election officers at a vote center is immediately accessible to (A) the county election board; and (B) the electronic poll lists used by precinct election officers at all other vote centers in the county.
12. For each precinct designated under subdivision (5) the number of electronic poll lists to be provided for the precinct.
13. The security and contingency plans to be implemented by the county to do all of the following:
(A) Prevent a disruption of the vote center process. (B) Ensure that the election is properly conducted if a disruption occurs. (C) Prevent access to an electronic poll list without the coordinated action of two (2) precinct election officers who are not members of the same political party. A certification that the vote center complies with the accessibility requirements applicable to polling places under IC 3-11-8.
14. A sketch depicting the planned layout of the vote center, indicating that location of equipment; and (B) precinct election officer within the vote center.
15. The total number and location of satellite offices to be established under IC 3-11-10-26.3 at vote center location designated under subdivision (2) to allow voters to cast absentee ballots in accordance with IC3-11. However, a plan must provide for at least one (1) voter center to be established as satellite office under IC 3-11-10-26.3 on two (2) Saturdays immediately preceding an election day.
16. The method and timing of providing voter data to a person who is entitled to receive data under this title. Data should be provided to all persons entitled to the data without unreasonable delay.

Poll Pad Hardware Specifications:

Apple iPad Air ME999LL/A 16 GB Tablet - 9.7"

In-plane Switching (IPS) Technology, Retina Display - Verizon - Apple A7 1.30 GHz - Silver - iOS 7 - Slate - 2048 x 1536 Multi-touch Screen Display (LED Backlight) - Bluetooth

Basic Specifications:

- Backlight Technology: LED
- Bluetooth: Yes
- Brand Name: Apple
- Cellular Data Connectivity Technology: CDMA2000 1xEV-DO Rev A
- Cellular Data Connectivity Technology: DC-HSDPA
- Cellular Data Connectivity Technology: EDGE
- Cellular Data Connectivity Technology: HSPA
- Cellular Data Connectivity Technology: HSPA+
- Cellular Data Connectivity Technology: UMTS
- Cellular Network Supported: CDMA2000
- Cellular Network Supported: GSM
- Color: Silver
- Flash Memory Capacity: 16 GB
- Form Factor: Slate
- Front Camera/Webcam: Yes
- GPS: Yes
- Graphics Controller Manufacturer: Imagination Technologies
- Graphics Controller Model: PowerVR G6430
- Maximum Battery Run Time: 10 Hour
- Operating System Platform: iOS
- Operating System: iOS 7
- Optical Drive Type: No
- Processor Manufacturer: Apple
- Processor Speed: 1.30 GHz
- Processor Type: A7
- Product Family: iPad Air
- Product Type: Tablet
- Screen Resolution: 2048 x 1536
- Screen Size: 9.7"
- Weight (Approximate): 1.05 lb
- Wireless LAN: Yes

Star Micronics TSP650II BTi Direct Thermal Printer Monochrome

- Wall Mount
- Receipt Print 3.15"
- Print Width 11.81
- in/s Mono 203
- dpi Bluetooth

Apple MFi certified, the TSP650II BTi receipt printer is approved for use with the iPod Touch®, iPhone® and iPad®. With operating system support for iOS, Android and Windows, the TSP650II BTi features the best of both worlds by coupling the comfort of legacy products with the speed and connection options demanded today in fast-paced point of sales environments. The TSP650II BTi's "JustWorks" SSP profile makes the pairing process very simple to use. It allows for a quick connection without the hassle of a passkey or having to choose between iOS and Android modes. Quick and ready to use, no user interaction is needed to pair the TSP650II BTi. One attribute that grabs the user's attention is TSP650II BTi's lightening fast print speed. Capable of printing 60 receipts per minute (300 mm/sec), the TSP650II BTi offers unrivalled processing power and outstanding data throughput. Equipped with easy "drop in and print" paper loading, small footprint and reliable guillotine cutter, the TSP650II BTi is a welcomed addition to any POS system. With exceptional performance, functionality, Bluetooth accessibility and iOS support, the TSP650II BTi embodies Star's motto of "Always Leading and Always Innovating."

Basic Specifications:

- Bluetooth: Yes
- Brand Name: Star Micronics
- Form Factor: Wall Mount
- Green Compliant: Yes
- Maximum Mono Print Speed: 11.81 in/s
- Maximum Print Resolution: 203 dpi
- Print Color: Monochrome
- Product Family: TSP650II
- Product Type: Direct Thermal Printer
- Recommended Use: Receipt Print
